Experience

Founding Product Designer

Thatch

Jun 2024 – Present

Joined at seed and scaled the design team through Series C, growing the team to 6 product and brand designers. Drove design initiatives on all 5 product pillars and laid the foundations of design principles, the design system, recruiting processes, and team culture.

Designed and prototyped the employer onboarding flow from 0 → 1 and beyond, educating and guiding employers on the best benefits strategy catered to their employees. Of ~1,000 employers, we saw a **27% increase in activation and 50% increase in viewing a quote**.

Designed the member onboarding flow from 0 → 1, with plan recommendation and Rx, doctor, and network search experiences that helps **hundreds of members per week make more informed healthcare decisions**.

Designed the enrollment hub, helping our largest customers see and manage their enrollment funnel, and take action when needed.

Designed v0 of a custom quoting engine, **cutting time to generate a quote in half and fueling 98.3% of all deals**.

Designed and prototyped a plethora of tools for employers like custom reporting, offboarding employees, a to-do list, year-to-year renewals, ACA reporting, role based access control, and more.

Spent the early days designing content like member and employer handbooks to be sent to every Thatch user, and creating templates to scale how we created assets and educational material.

Product Design Intern

Mercury

May – Aug 2023

Helped 25K+ founders predict their yield on investments totaling \$X00M+ in Mercury Treasury by designing a Yield Estimator, fostering trust and retention.

Education

University of Waterloo

Waterloo ON

Bachelor of Applied Science (BASc), Systems Design Engineering
